gle's infrastructure

on has been created

n by pointing you at the relevant resources

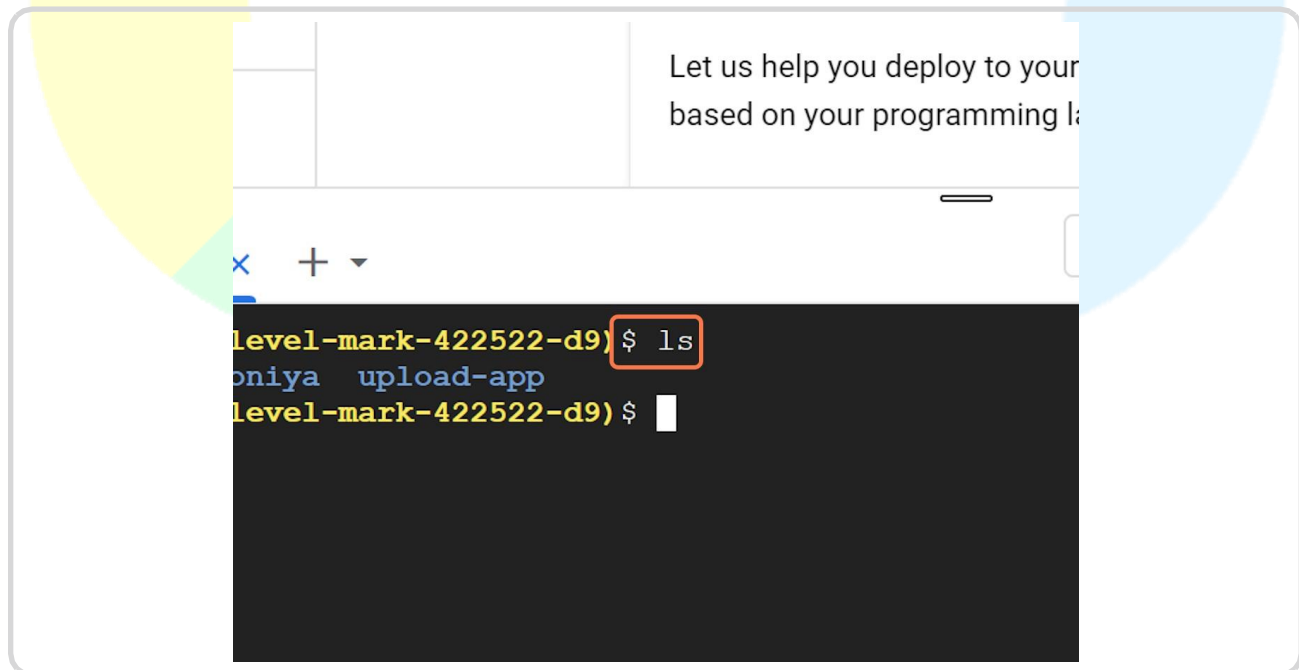

STEP 11

How to clone your app github into your clou9 shell

STEP 12

Type ls to make sure the folder exists.

STEP 13

T7pe - c9 uploa9wapp

Let us help you deploy to your application by based on your programming language.

✕ + ▾

Open Editor

```
level-mark-422522-d9) $ ls
oniya  upload-app
level-mark-422522-d9) $ cd upload-app
upload-app (level-mark-422522-d9) $
```

STEP 14

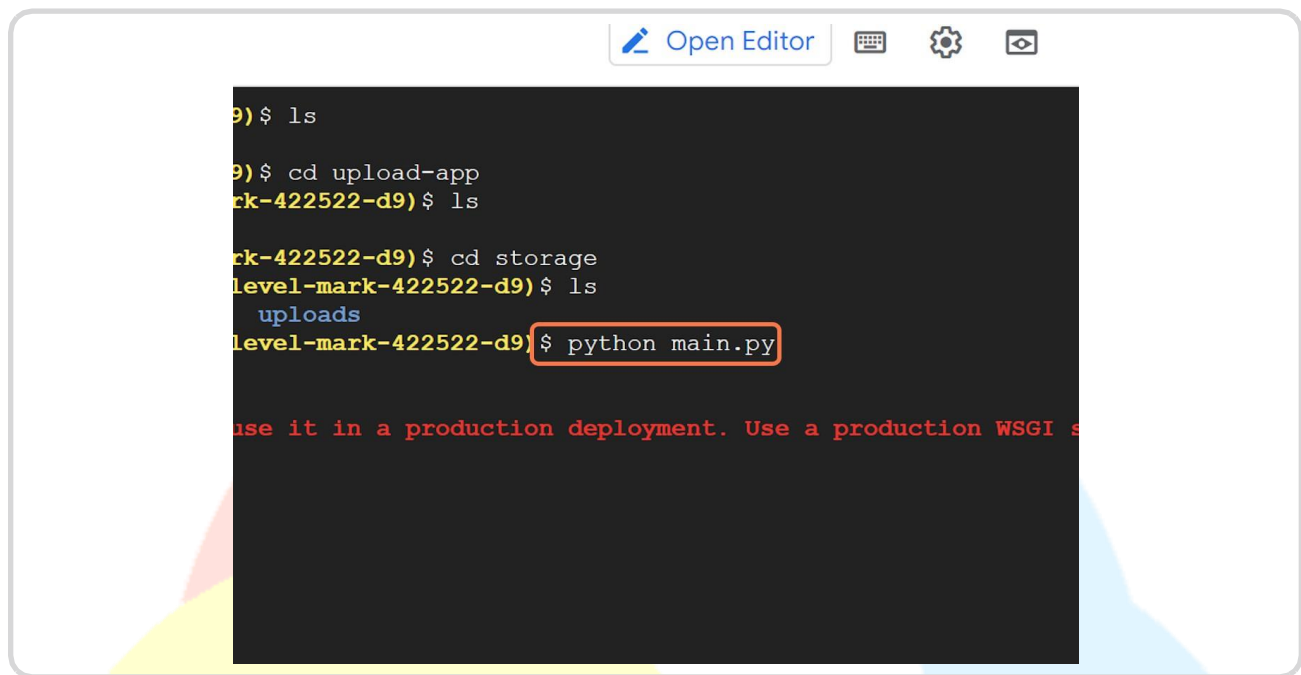

T7pe - c9 storage

Open Editor

```
level-mark-422522-d9) $ ls
upload-app
level-mark-422522-d9) $ cd upload-app
level-mark-422522-d9) $ ls
level-mark-422522-d9) $ cd storage
```

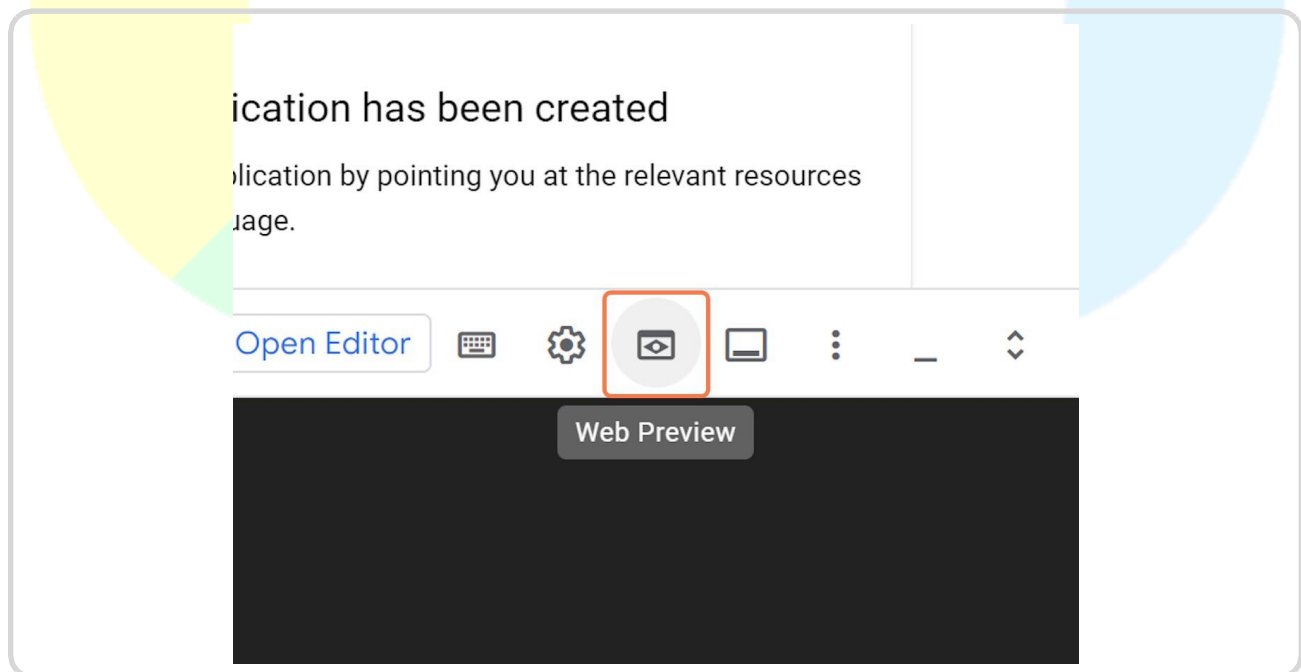

STEP 15

Run the python code for your app.

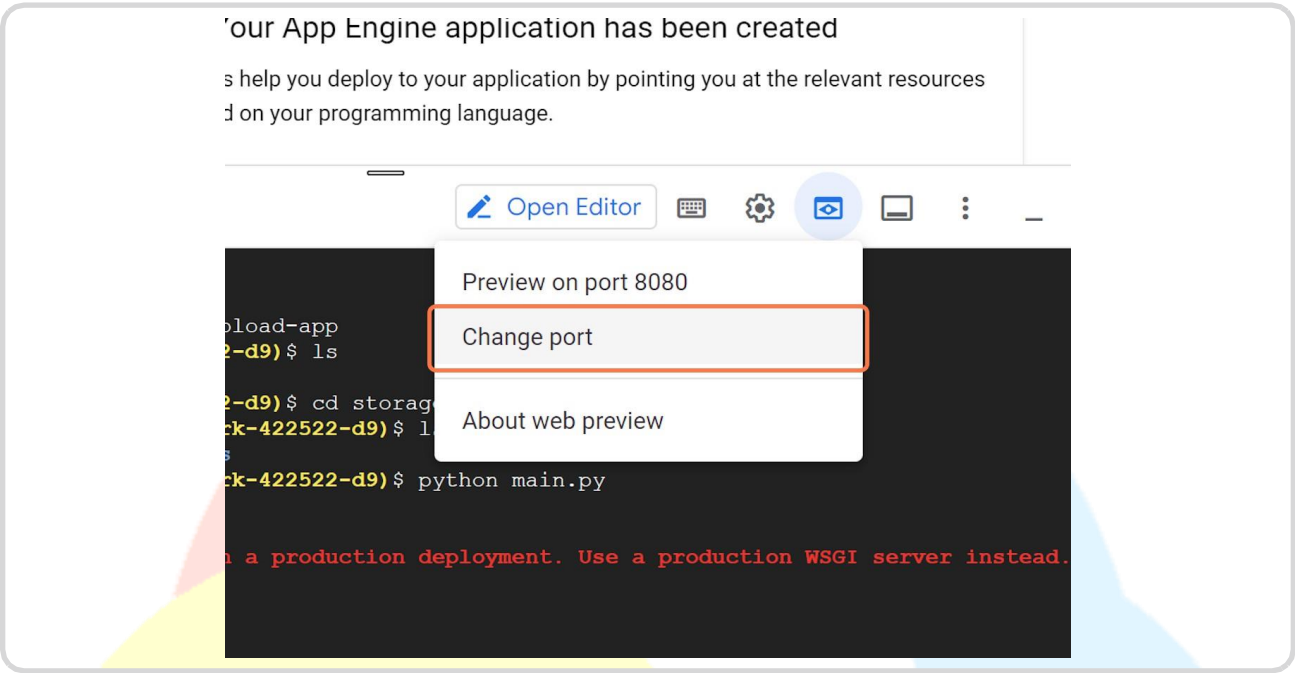

STEP 16

Click on Wex PreviewG

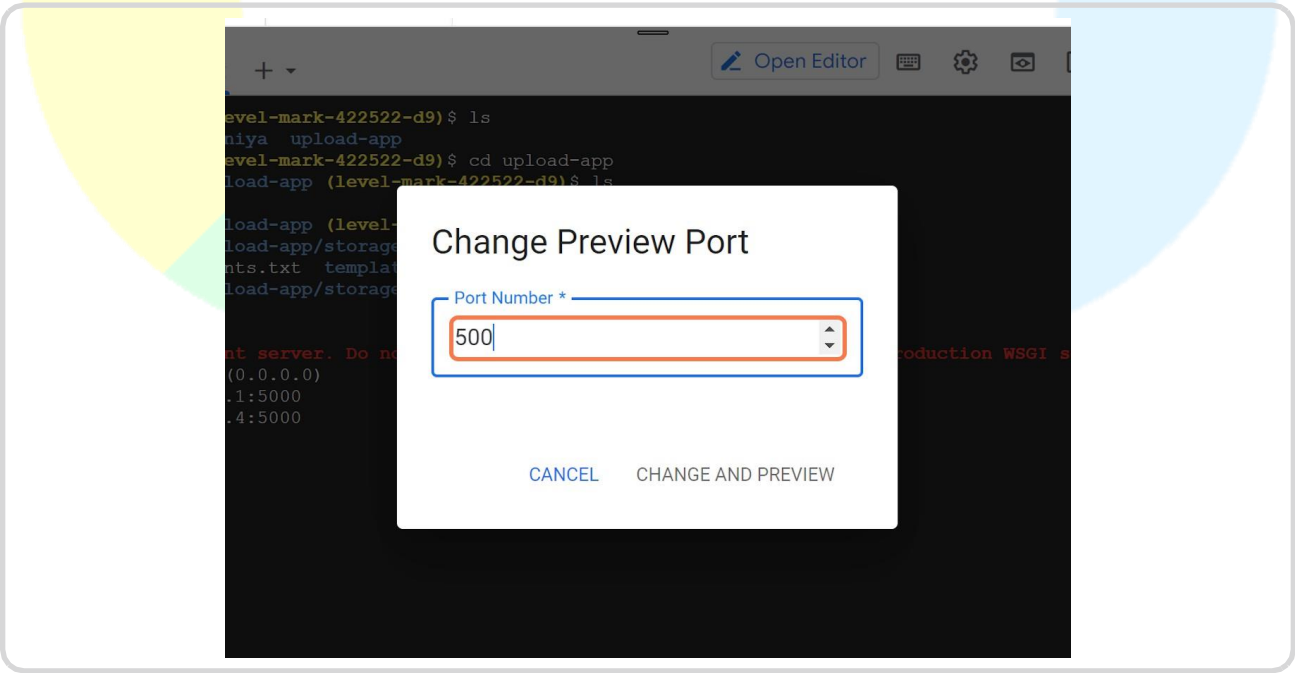

STEP 18

Click on Change port

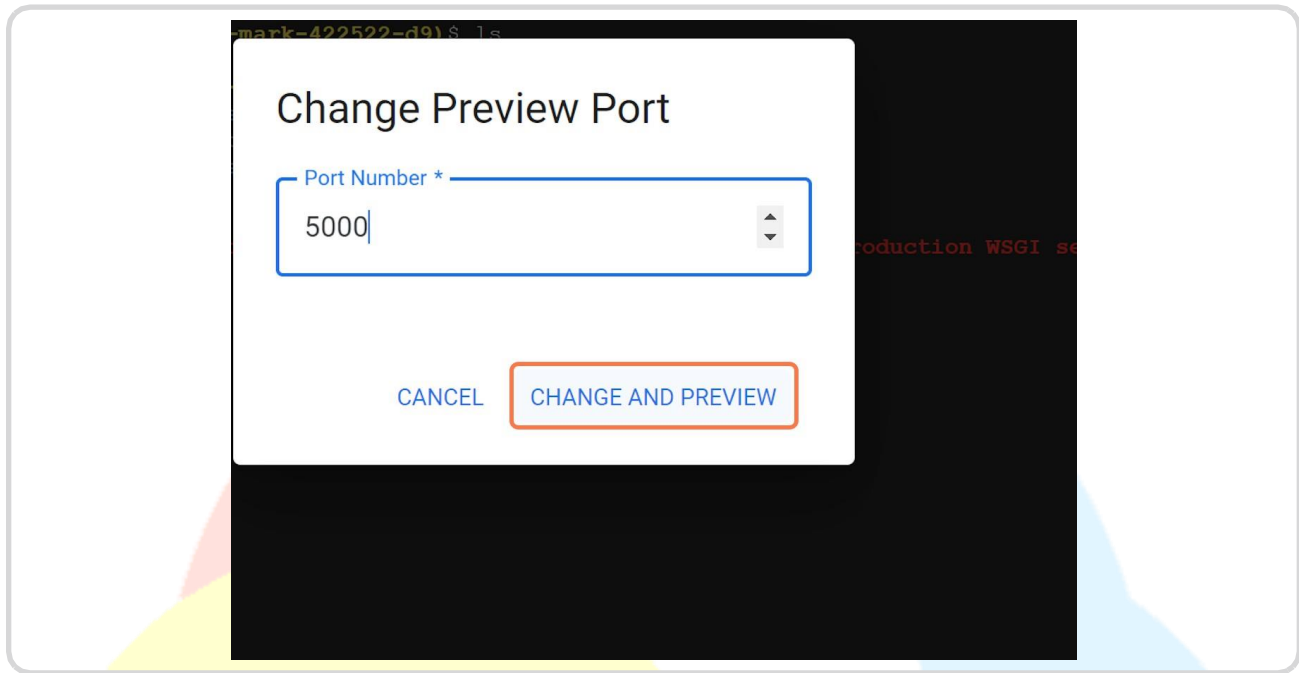

STEP 18

T7pe d5YYYd

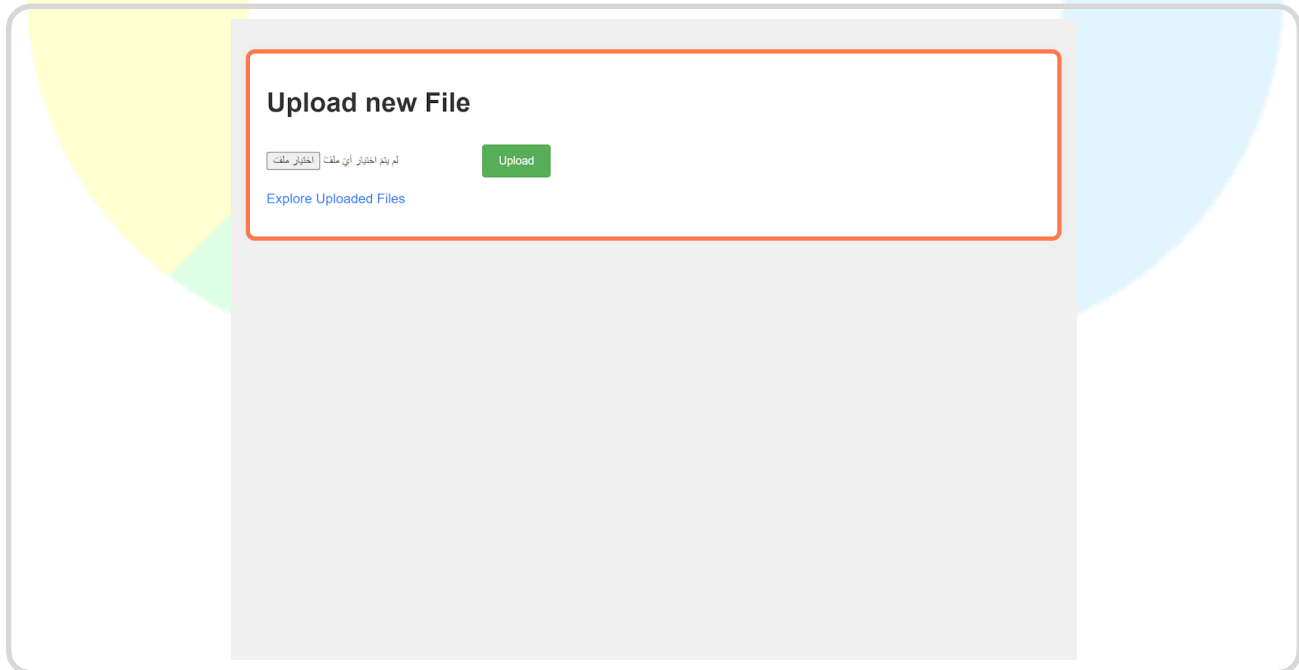

STEP 1X

Click on **CHANGE AND PREVIEW**

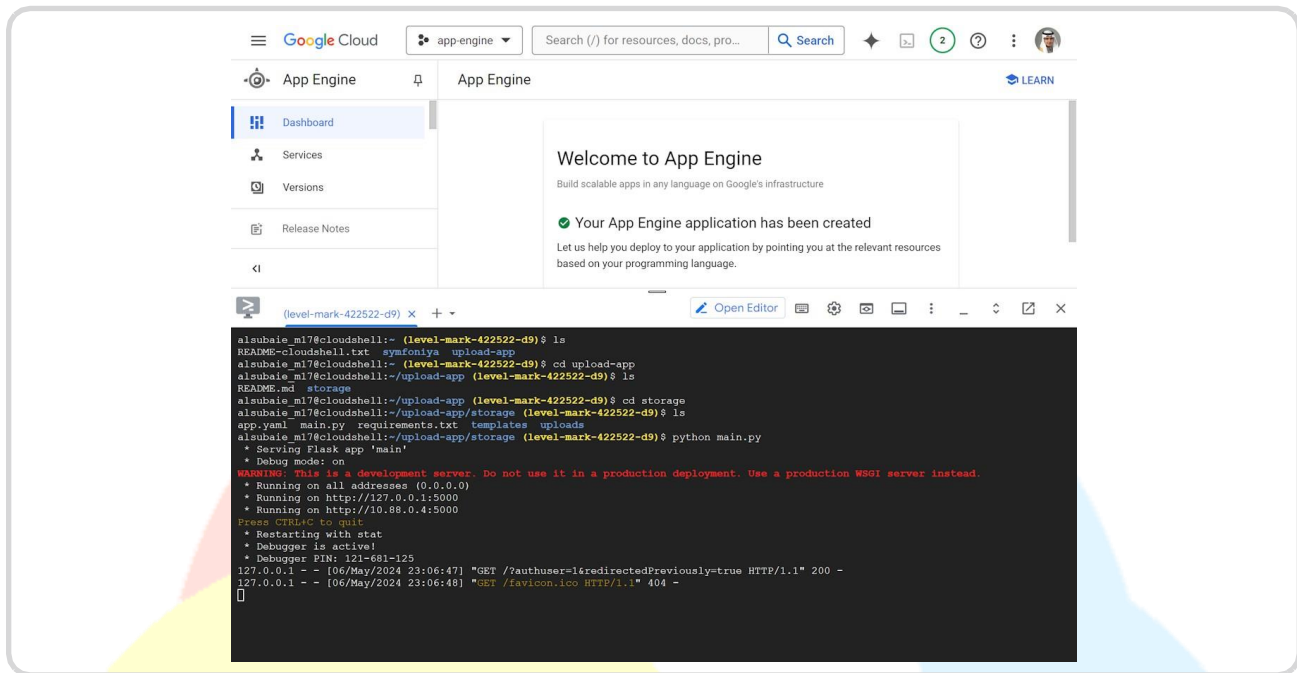

STEP 2Y

An9 here is 7our app.

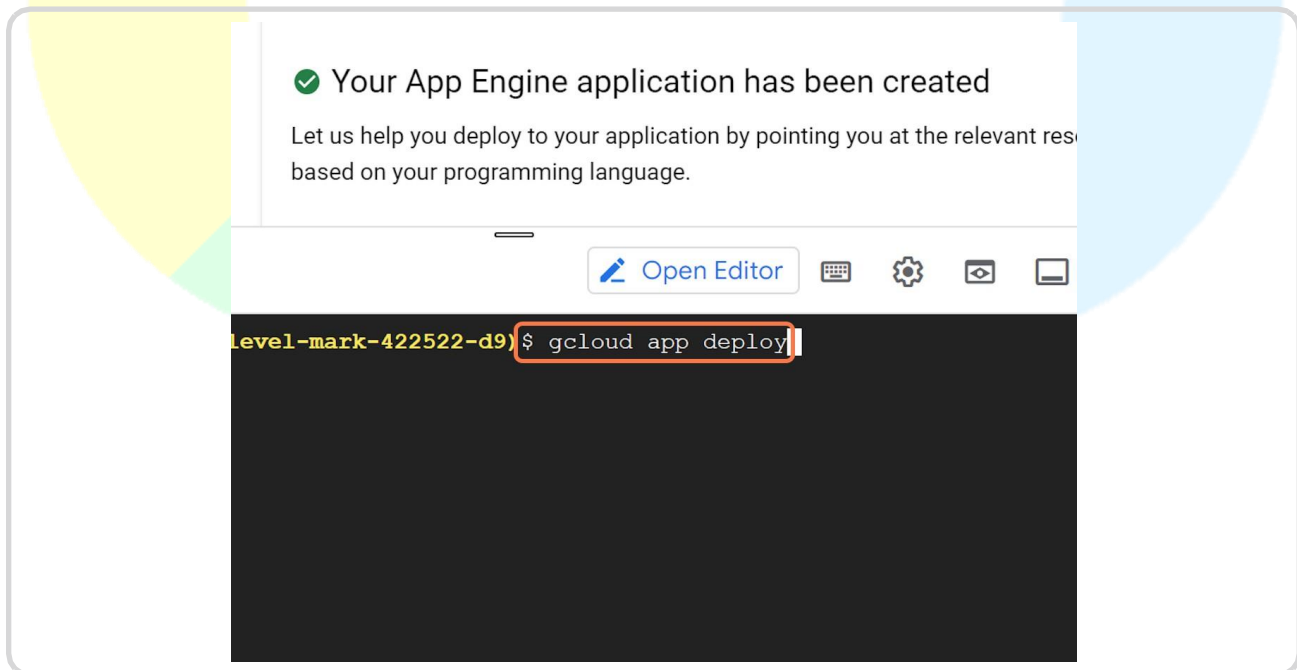

STEP 21

As You can see here is m7 app starting Github app engine.

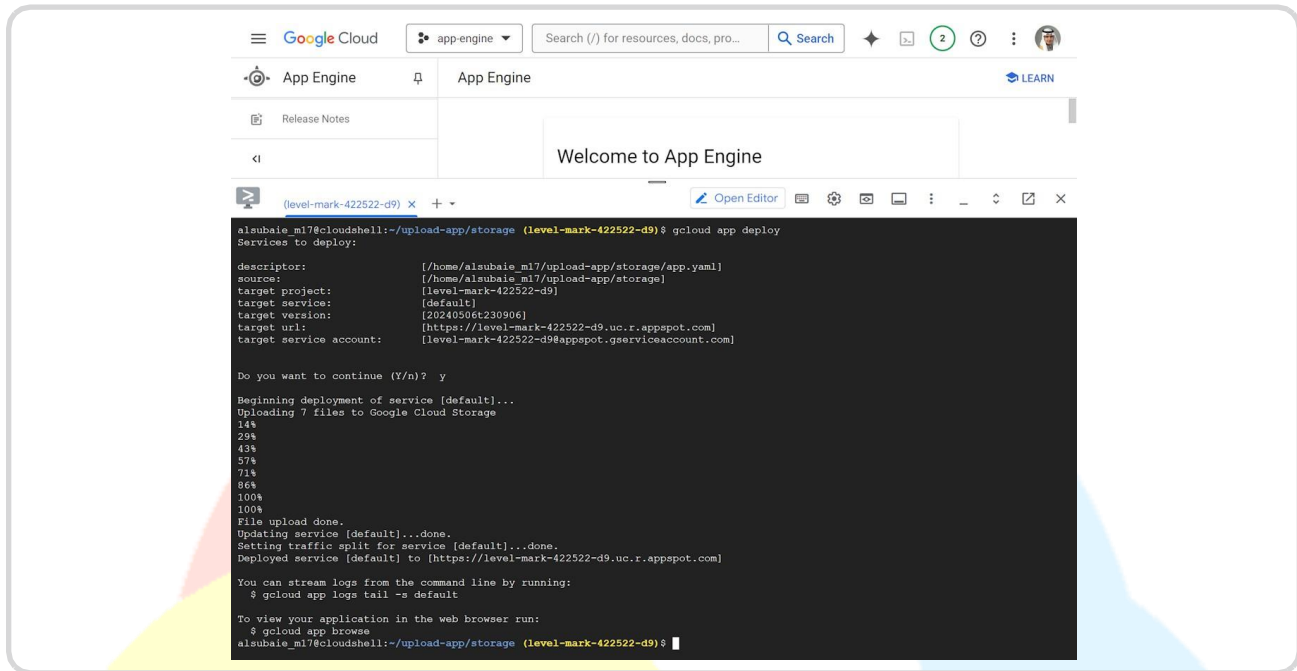

STEP 22

We need to deploy the app on the app engine that we built before.

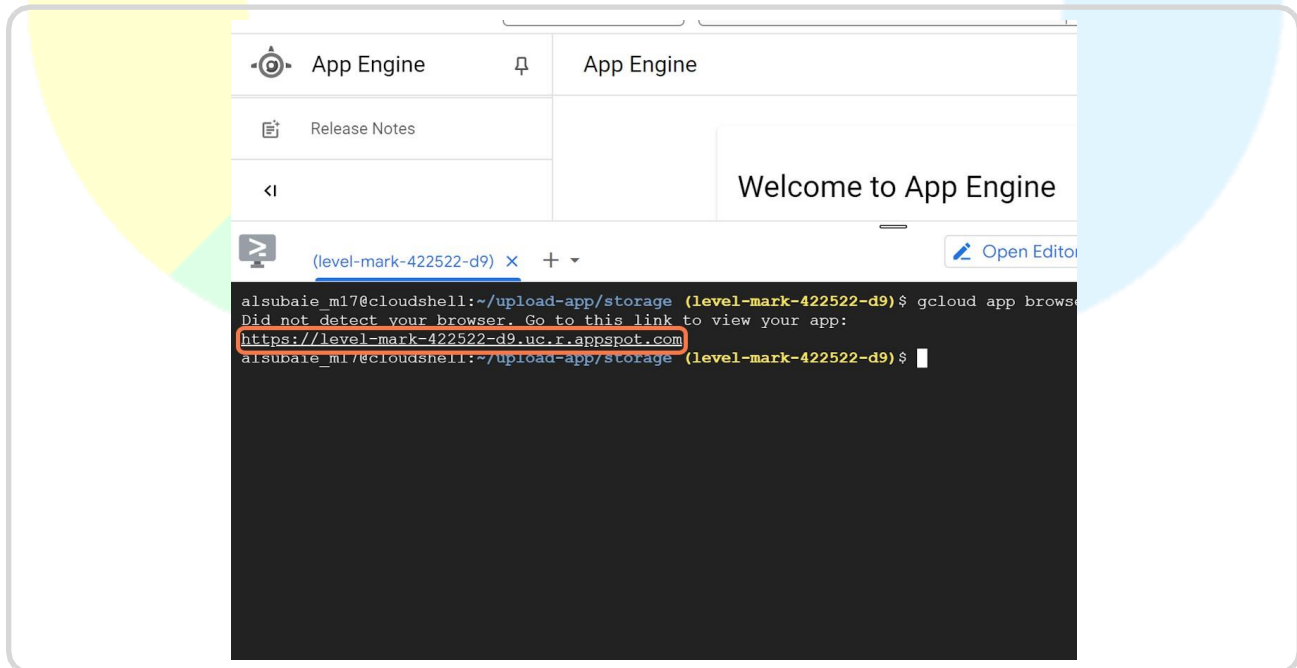

STEP 23

And here the app engine is running.

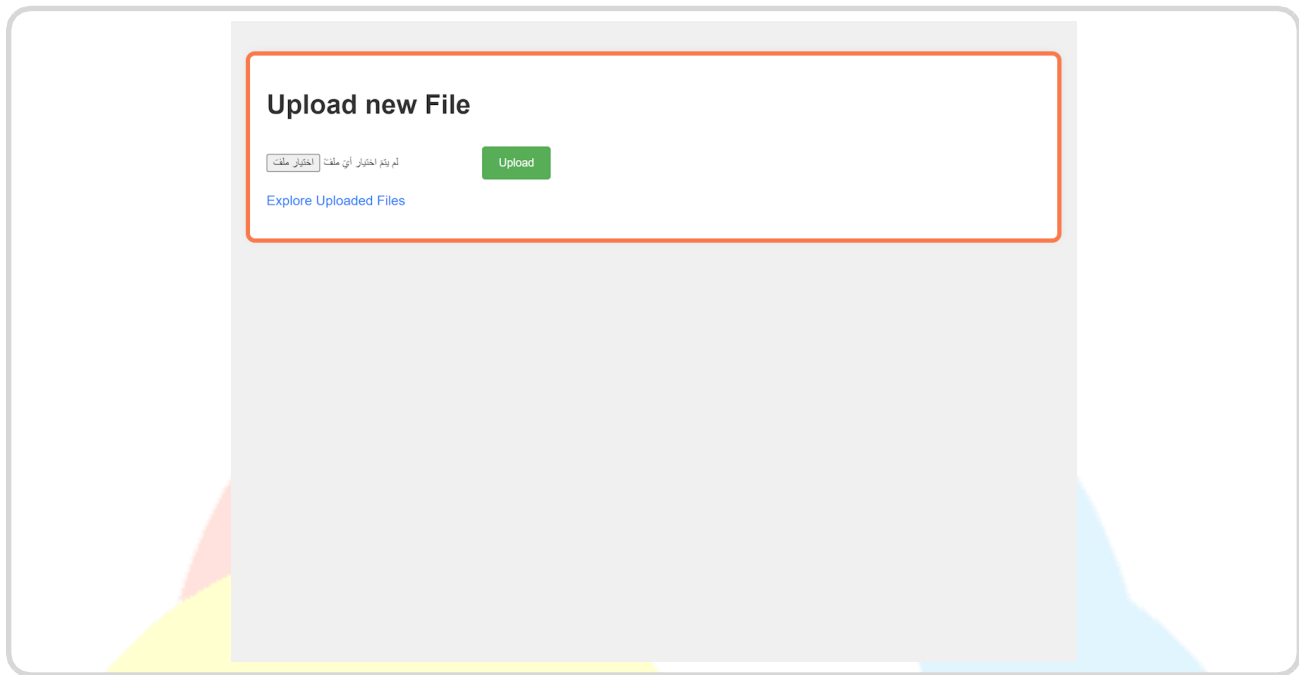

STEP 24

type 'gcloud app browse' to visit your app through your browser.

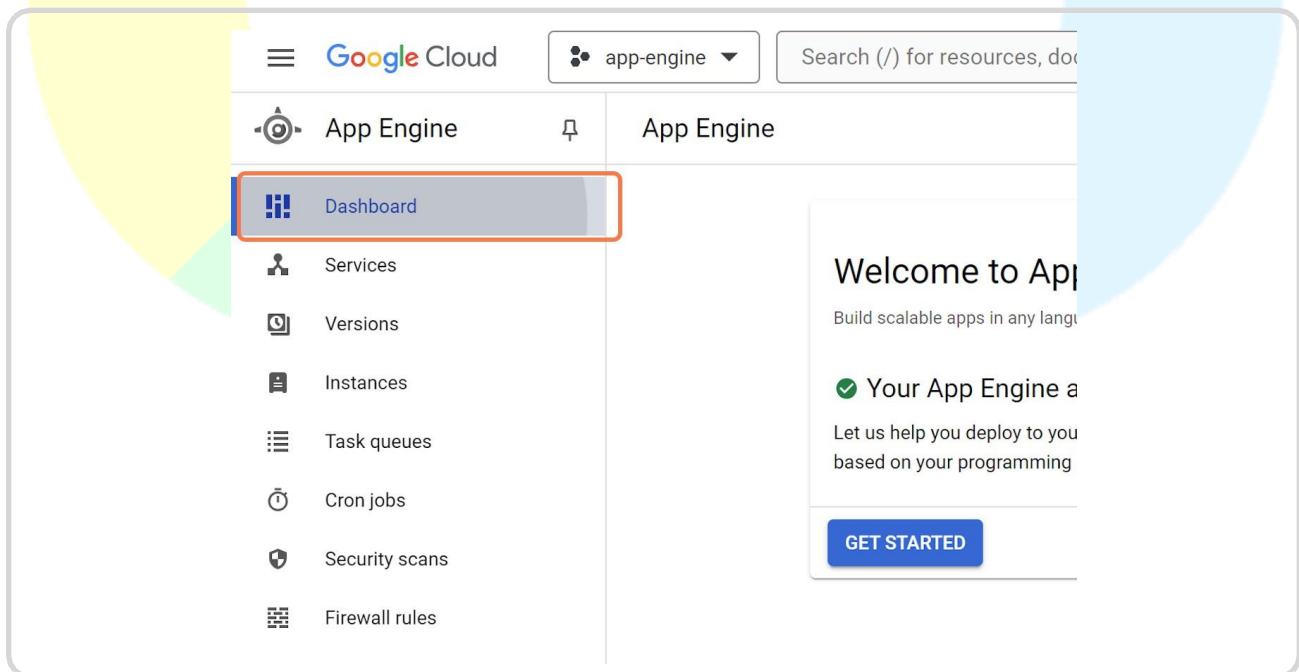

STEP 25

Congratulations; here is 7our app.

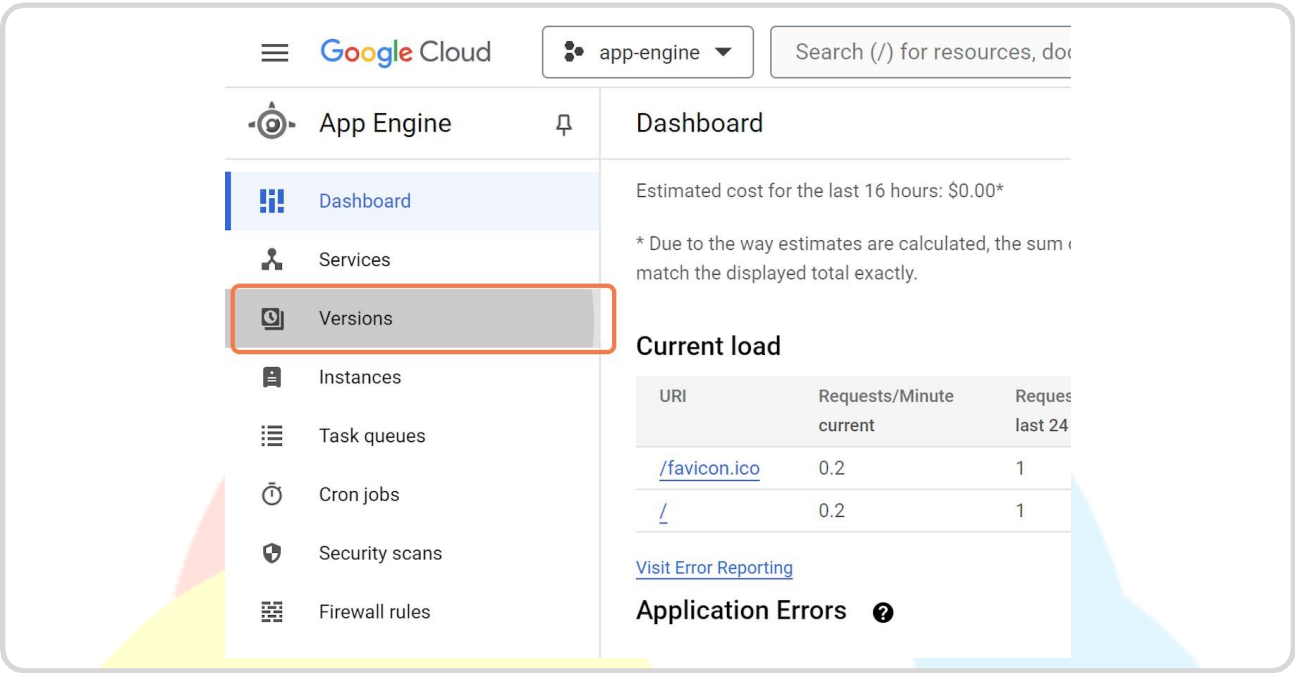

STEP 26

Click on Dashxoar9

STEP 28

Click on Versions

STEP 28

Here is the version of the app engine.
